

Project Experience

Project information – Bridge Dunvagan

Location: North Alberta, Canada
Project: Full Removal and Repaint

Surface Preparation

SSPC-SP10 Near White Metal Blast.

Coatings System

MCU-MIOZINC	75 µm DFT
MCU-MIOMASTIC	75 µm DFT
MCU-TOPCOAT	75 µm DFT

3 year project completed in 10 months (2 summers).

- Full removal + repaint
- Snow and temperatures down to -50° C in winter
- Daily use of road salts to DE –Ice
- Pre stripping in primer and topcoat
- Notice picture Caulking on all seams.
