

Project Experience Marine

Project information

location	On board, crew fleet
client	Hoegh Shipping
project	Ballast tank
surf. Preparation	WJ 2M
system	MCU-Miozinc MCU-Mastic MCU-Mastic

The initial project approximately 15,000 m² was carried out in 1999-2000 as a trial project while vessel was under management to Uglund Shipping, Norway. In 2004 vessels were back under management of Hoegh Fleet services and a full inspection was carried out and MCU coated tanks had virtually no corrosion and rated Ri 3 – less than 1%. This series of vessels were approaching 25 years and by using MCU these vessels had a life extension of more than 10 years.
