location Cape Town, South Africa
client Cape Town city council
project Corrosion protection
 multiple units

climatic conditions Winter 18°C
 65% RH

substrate

surf. Preparation WAB Sa 2,5

system MCU-Miozinc

The refurbishment of earthmoving equipment requires an heavy industrial coating with high abrasive and wearing properties as well as fast turn-around times.

MCU-Miozinc is used as the specified primer for the ability to prime over old coatings as well as being universal. This solves 2 problems in 1 coat for the refurbishing contractor. This contract has been in place for over 12 months and is ongoing.
