

Project Experience Oil and Gas

Project information

| | |
|----------------------------|---|
| Client | Phoenix Park Gas Processors Limited (PPGPL) |
| Location | Trinidad & Tobago |
| Project | Maintenance |
| climatic conditions | Hot and humid |
| substrate | Steel pipes |

Project involved the real-time recoating of natural gas pipes that had constant condensation (damp surface).

A year later there is no sign of corrosion, colour degradation or adhesion failures.

PPGPL is a subsidiary of the National Gas Company of Trinidad and Tobago, one of the largest gas processing facilities in Latin America and the Caribbean.
